

# PENTEK®

## ACCESS BOXES

# THE ENGINEERED VALVE BOX SYSTEM

**Cast iron traffic lid** for water or gas service. Drop-in and locking.

**Gasket seal**

**Cast iron risers**, in 3/4", 2 1/2", and 3" heights for resurfacing operations.

**Cast iron ring** is available in full-flanged for gas.

**Top section of Polyiron® plastic** responds to both dip needles and ferromagnetic locators. Variety of sizes and adjustable sections provide heights from 25" to 91".

**Bottom white section** has bell bottom with knockouts. Accommodates valves up to 12". White material makes valve easier to see.

**Optional #6 base** fits standard bottom section. Accommodates valves up to 14".

**Integral Valve Key (IVK)** brings 2" operating nut to surface. Adds cleanout dish.

185003 = 26" - 44"  
185004 = 44" - 80"

Roadway Valve Box Assembly  
(See Product Literature #320072 for more information)

## WITH COMPONENTS FOR VIRTUALLY ANY INSTALLATION

PENTEK® Access Boxes offers you an Engineered Valve Box System that adapts to virtually any installation, new or retrofit.

The tough, lightweight, thermoplastic boxes are easy to install, easy to store, and easier to handle than heavy cast iron boxes.

Our patented Polyiron® material responds to both dip needles and ferromagnetic locators, so the box is easy to locate, even if the cast iron top is sheared off.

PENTEK® offers a broad line of underground utility products, including curb service boxes and meter boxes.
